

# Fixing leaks can be as **easy** as **1-2-3**

**1. Find Leaks**—Ask an adult to help you test for leaks by placing a drop of food coloring in the toilet tank. If the color shows up in the bowl, you have a leak!

**2. Fix Leaks**—If you find a leak, let your parent or guardian know. Fixing leaks can be as easy as replacing a toilet flapper.

**3. Save Water**—By nipping those drips, you're helping save water for future generations of other kids just like you!

Don't Let  
This  
Water Waster  
**Drain**  
Your Resources

## Sogosaurus

Sogosaurus leaves her sprinkler on even after a rainfall. Make sure your family waters the yard only when needed—and don't water the sidewalk!

Kids can play the *Test Your WaterSense* game at [www.epa.gov/watersense/kids/games.html](http://www.epa.gov/watersense/kids/games.html) and learn about saving water at home.

## Drainiac

Drainiac lets water gush down the drain, especially when she brushes her teeth. This drains our water supply. Turn off the water while you brush your teeth and save eight gallons every time!

## Drip Drip

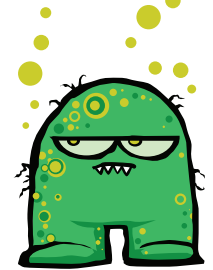

Drip Drip likes to hear the sound of his own name. That's why he lets his faucet leak, wasting more than 3,000 gallons of water a year, enough for 180 showers! Tightening the tap or replacing a washer can fix this problem.

## Swirly

Swirly wastes water by flushing the toilet too much. Don't use your toilet as a trashcan. If you flush just one less time a day, you could help save more than 500 gallons a year!
