Clean First Round of Water Quality Results for North Upper Truckee

South Lake Tahoe, CA (November 18, 2020) – The North Upper Truckee and Chiapa neighborhood are currently under a boil water advisory. The South Tahoe Public Utility District collected 30 water samples within the affected area on the evening of Tuesday, November 17, 2020. The tests for chlorine residuals came back normal (ranging from 0.4 to 0.8 parts per million) and no coliform bacteria was detected in any of the samples. Another 30 water samples were collected on the evening of Wednesday, November 18. If after 24 hours the tests have similar results, the boil water advisory will be lifted.
